

Appl. No. 10/633437  
Amdt. dated October 28, 2004

### **C. Remarks**

Figure 5 is amended. The temperature scale on the left side of the diagram has been revised. Please advise whether claims 4, 29, 47, and 67 as rewritten eliminate the previous Markush language. Also please let me know prior to writing your action if the changes that I have suggested satisfy the other 112 concerns you had set forth on pages 3 through 5 of your August 5th office action or to discuss any further changes that may be necessary.

Respectfully submitted,

By Paul A. LaViolette, Ph.D.
